

MUHAMMED HÜSEYİN ÖZDEMİR

Backend Developer

PERSONAL BACKGROUND

- Birth Year: 1994
- Wissen Akademie Full-Stack Developer Course (2022-2023 (Graduate))
- Mathematics and Computer Science (2019-2022 (Graduate))
- Minor with Department of Molecular-Biology and Genetics (2021 - 2022 (Graduate))
- Department of Nano Science and Nano Technology (2017-2019(Quit))
- Electronic and Communication Engineering (2013-2017(Quit))
- **Military obligation is completed.**

ACHIEVEMENT

- I graduated from Istanbul Kültür University, Department of Mathematics and Computer Science. During my education, I completed my minor education with the Department of Molecular Biology and Genetics.
- I have gained project experience on C/C++, C#, Python, Java/JavaScript, Html, CSS, PHP, R, MatLab, SQL programming languages.
- Online courses to increase my application and project experience; I have strengthened my trainings with Udemy, Turkcell Academy, BTK Academy.
- Finally, I completed my projects on C#, .Net, ASP.Net, HTML, CSS, JavaScript, ReactJS, NodeJS as a Full Stack Developer with Wissen Akademie for 800 hours.
- The subjects of the projects I have done are; Payment systems infrastructure, Hotel reservation application, AdoNet database applications, E-Commerce services, etc. I have used layered architecture and other clean coding architectures in my projects.
- I can use advanced C# and frameworks and build projects from scratch.
- At intermediate level, I can do object-oriented programming with Python and use the Django framework. I can also do operations such as data analysis and machine learning with Python at an intermediate level.
- I can use most popular or retro databases in SQL.

WORK EXPERIENCE

.Net Backend Developer (Working on a project basis)

Mes Software | August 2023 - October 2023

- Cloud call centre systems were developed. The systems developed enabled the existing systems to be configured and used more effectively. The effective use and efficiency of the call centre platform, from the sales channel for the customer to payment planning and performance reporting for the account manager, was managed through a single system.
- The technology and languages used; C#, API, SafeGateWay, HashKey, ,RabbitMQ, SignalR Queue, MsSQL-Stored Procedure, Entity, Dapper etc.

Full-Stack Developer

Woc Software Solutions | March 2023 - August 2023

- Module creation on ERP and CRM systems. Reshaping the created modules according to user needs. Designing the interfaces of the modules. Debugging.
- The technology and languages used; TypeScript, JavaScript, C#, CSS, HTML, DevExtreme, Entity, etc.

Full-Stack Developer - Trainee

Wissen Akademie | August 2022 - March 2023

- During the 800 hours of full stack developer training with 85% practice, we completed the projects by using detailed and clean coding methods on C# / .Net, HTML, CSS, JavaScript, NodeJS, React, SQL languages.
- From the hotel reservation system to the payment methods system, SQL normalization methods, AdoNet, WinForms, MVC, API, Entity etc. projects were carried out.
- You can access the details of the projects via the GitHub link.

Software Developer (Working on a project basis)

UygunFly | February 2023 - March 2023

- In order to determine the applications needed within the company, software architecture was designed and developed for the planned applications as a department manager and software architect. CRM and accounting applications were developed for internal use with .Net/C#. Due to the high costs in the tourism sector and the company budget, the projects could not be continued and the department was closed.

Full-Stack Developer (Working on a project basis)

MarketersTech | November 2022 - January 2023

- In the field of marketing strategies, I designed the back side of web-based applications with artificial intelligence algorithms.
- In this process, I used Python - Django web framework. I did the necessary organization and work for the frontend and also helped in the design.

EDUCATIONAL BACKGROUND

Bahçeşehir University - Wissen Akademie

Full - Stack Developer Course [C#] (August 2022 - March 2023)

Istanbul Kültür University

Minor with Department of Molecular-Biology and Genetics
2023 graduate

Istanbul Kültür University

Department of Mathematics-Computer Science
2022 graduate

- 3.05 GPA

Anadolu University

Management Information Systems 2017 -
• 2nd class

Private Istanbul Uskudar Anatolian High School

2012 graduate

MEMBERSHIP

- IEEE Turkey, IKUMCS member
- President of Dogus University Unibjk (2013)
- Vice President of Beykent University IEEE (2015-2016)
- Moderator at IEEE Turkey Beykent University event (2015)

HOBBIES

- Watching a movie in the cinema
- Dog training
- Visiting chef restaurants, experiencing different cuisines
- Reading science fiction books
- Play basketball

WORK EXPERIENCE

Systems Analyst

Oflaz Şirketler Grubu | March 2022 - September 2022

- I prepared the reports of the company tender files and the purchasing documents. For maximum benefit, I achieved an average of 50-70% success and extra income per month instead of modern and up-to-date products and processes and excessive costly and erroneous operations in the system.

Data Scientist Intern

StartUp Heroes(Migros One) | November 2021 - January 2022

- I have done analysis studies with big data and improved myself in machine learning. I contributed to the work related to artificial intelligence within the company.
- In e-commerce mobile applications, the user was taught to the artificial intelligence to estimate the amount of bags that the user will need according to the order amounts and product range. Discounts and coupons, by-product services were offered according to user orders.

PHP Developer Intern

Digital Trade(bilet.com) | June 2021 - July 2021

- PHP has improved itself by making projects on HTML, JAVA and hastried to develop solutions to problems in internal structures.
- Frontend and backend applications were made for user feedback of the websites within the company.

CO-FOUNDER

Therapy Bike Food and Coffee | February 2016 - 2020

- In the developing world and in the era of technology, he made the necessary system analyses and made new plans that were missing from the brand and allowed him to play to the top in his sector.
- Increased sales and brand awareness by more than 35%.

BASIC SKILLS

- C#/.Net, ASP.Net, SQL 
- Python/Django 
- MSSQL, PostgreSQL, DbSQLİTE 
- MongoDB, NoSQL, TSQL 
- Algorithm design and analysis 
- PHP, HTML, CSS, JAVASCRIPT, C/C++, MatLab, R 
- MSOffice Programs 
- Dog Training 
- English 
- GitLab, GitHub, Azure Devops, DevExpress
